RE: FM 1613 February 2017 revision Pressure Class changes

Dear Customers,

Effective February 2017, FM Approvals has updated the Pressure Classes in standard FM 1613 to match those found in AWWA C906-15. Please see <http://www.fmaprovals.com/standards-development/new-and-updated-standards> for a copy of the current version.

In response to the newly published FM Approvals Class Number 1613 February 2017 revision, WL Plastics has upgraded our official listings with FM Approvals to reflect the new pressure classes. WL Plastics will no longer offer previous classes except in special circumstances when specifically requested by the customer. Technical support and documentation for the transition will be provided.

Moving forward, the following pressure classes apply for WL Plastics <FM> marked pipe:

- **PC 200 = DR 11** : (Previous class 150)
- **PC 250 = DR 9** : (Previous class 200)
- **PC 335 = DR 7** : (Previous class 250)

WL Plastics will offer a triple stamp print line that meets the requirements of ASTM F714, AWWA C906, and FM1613.

*Example Triple Stamp Print Line:*

**IPS 12" DR9 WL Plastics TX - PE4710-PE445574C PC250 AWWA C-906-ASTM F714- FM1613 A1-01-01-16 NSF-61 50FT**

If you have any further questions, please do not hesitate to contact us.
