

WL105 – Striped Pipe

Color Stripes

Identify Service, Pressure Class or DR

Permanent co-extruded color stripes
in the pipe OD for instant visual
identification of Piping Service,
Pressure Class or DR

- ◆ Identify multiple services in the same trench
- ◆ Stripe 2-in to 54-in; any PC; any DR
- ◆ Combine with 4-in to 18-in *Camcore*™
- ◆ Combined with WL Plastics standard permanent heat-indented printlines
- ◆ Same PE compound as the pipe but different color – Stripes do not affect Pressure Class
- ◆ Six permanent same-color stripes extruded into the pipe outside surface
- ◆ Color stripes per ASTM and APWA standards for piping service

YELLOW	Gas distribution / gathering
BLUE	Potable water
GREEN	Sewer, force main
PURPLE	Reclaimed, irrigation water
RED	Firewater

- ◆ Color stripes for PC, or DR identification (**pipe service colors are excluded per ASTM standards**); install pipe by color in the correct location for the design pressure
- ◆ **PE4710** HDPE Material
- ◆ Available for all ASTM, AWWA, FM and API HDPE piping standards
